

Q1. Highest and Lowest Margin Sub-Category and their percentages

Highest: Label at 44.4%

Lowest: Tables at -8.6%

Recommendation: Perhaps consider negotiating tables prices with the supplier for reduction.

Q2: Fastest growing Region

West at 33.42%

Recommendation: Try to increase my sales and investment in the Western Region.

Q3. Furniture profitability

Furniture Total Profit= \$18,451 coming from Chairs and Furnishing category.

Tables Loses Money= -\$17,725

Recommendation: Try to investigate why tables loses money in every region except west and then work on the solutions to salivate it.

What I'd do next

1. Investigate more about tables prices and workout things with the supplier
2. Double down on my Highest Margin Products E.g. Labels, Envelopes etc
3. Expand my sales operation in the Western Region and lay down strategies to improve sales in the other regions.
